- Switching between navigation, media, and vehicle data views.
- Using voice commands to control the display.

4. MMI Touchpad and Voice Control

The MMI (Multi Media Interface) touchpad is the central hub for infotainment. Voice control allows hands free operation.

- Setting up voice recognition and language preferences.
- Common voice commands for navigation, music, and phone calls.
- Tips for improving voice command accuracy.

5. Climate Control System

The climate control system offers dual zone temperature settings and automatic climate modes.

- Programming the automatic climate mode for optimal comfort.
- Using the “Eco” mode to reduce energy consumption.
- Diagnosing issues such as uneven temperature distribution.

Maintenance & Service Guide

Regular maintenance is the key to preserving your Audi A4 B9’s performance and resale value. The **audi a4 b9 betriebsanleitung** outlines a comprehensive service schedule. Below are the essential maintenance tasks:

1. Oil and Filter Change

Use the recommended 5W 30 synthetic oil and follow the procedure outlined in the manual:

1. Warm up the engine for a few minutes.
2. Place a drain pan under the oil filter and engine block.
3. Remove the oil drain plug and allow the oil to drain completely.
4. Replace the oil filter with a new one.
5. Reinstall the drain plug and add the specified amount of new oil.
6. Check the oil level with the dipstick and top off if necessary.

2. Tire Care

The manual specifies the recommended tire pressure and rotation intervals.

- Check tire pressure monthly and adjust to the values listed in the manual.
- Rotate tires every 10,000 km (or 6,000 miles) to ensure even wear.
- Inspect tread depth and look for signs of uneven wear or damage.

3. Brake System Inspection

Brake pads and discs should be inspected regularly.

- Check pad thickness at least every 5,000 km.
- Listen for squealing noises that indicate worn pads.
- Inspect brake fluid levels and replace the fluid every 2 years.

4. Battery Maintenance

Even though the battery is sealed, it’s essential to keep the terminals clean.

- Inspect the battery terminals for corrosion.

- Clean terminals with a mixture of baking soda and water.
- Check the battery’s charge level with a multimeter.

5. Fluid Checks

Other fluids to monitor include coolant, brake fluid, transmission fluid, and power steering fluid.

- Coolant: Check the coolant level and temperature gauge regularly.
- Brake Fluid: Replace every 2 years or as recommended.
- Transmission Fluid: Check the level and condition according to the service schedule.
- Power Steering Fluid: Inspect for leaks and top off if needed.

6. Service Intervals

Below is a simplified version of the service schedule. For detailed instructions, refer to the manual’s service section.

Interval (km)	Service Item
10,000	Oil and filter change, tire rotation, brake inspection
20,000	Coolant flush, battery inspection, tire pressure check
30,000	Transmission fluid check, brake fluid replacement
40,000	Full service: oil, filter, coolant, brake fluid, power steering fluid
60,000	Major service: all above plus timing belt (if applicable)
